

Cledara

Engage

Next-level software visibility

Cledara Engage allows you to see all the software subscriptions accessed across your business, even those that are unapproved, as well as monitor the users accessing them.

When your colleagues install Cledara Engage, you'll be able to see the activity both on approved and unapproved software accessed by your colleagues.

For example, "Claire has accessed Slack, Pipedrive and Apollo, but hasn't logged in to Hubspot this month. Also, Claire has logged in to Metabase and SurveyMonkey, which we currently do not subscribe to. I will let Claire know that Metabase should be added to Cledara, and that we already use Qualtrics, so there is no need for us to pay for a SurveyMonkey subscription".

How Cledara Engage works

Happens on your device

- 1** Once you install Cledara's Engage browser extension and are logged in to your company-managed Chrome browser, Cledara Engage gets to work.
- 2** The extension filters only look for SaaS application access and discards all other browsing data.
- 3** We send the **list of matched SaaS applications** to Cledara.

Happens on Cledara

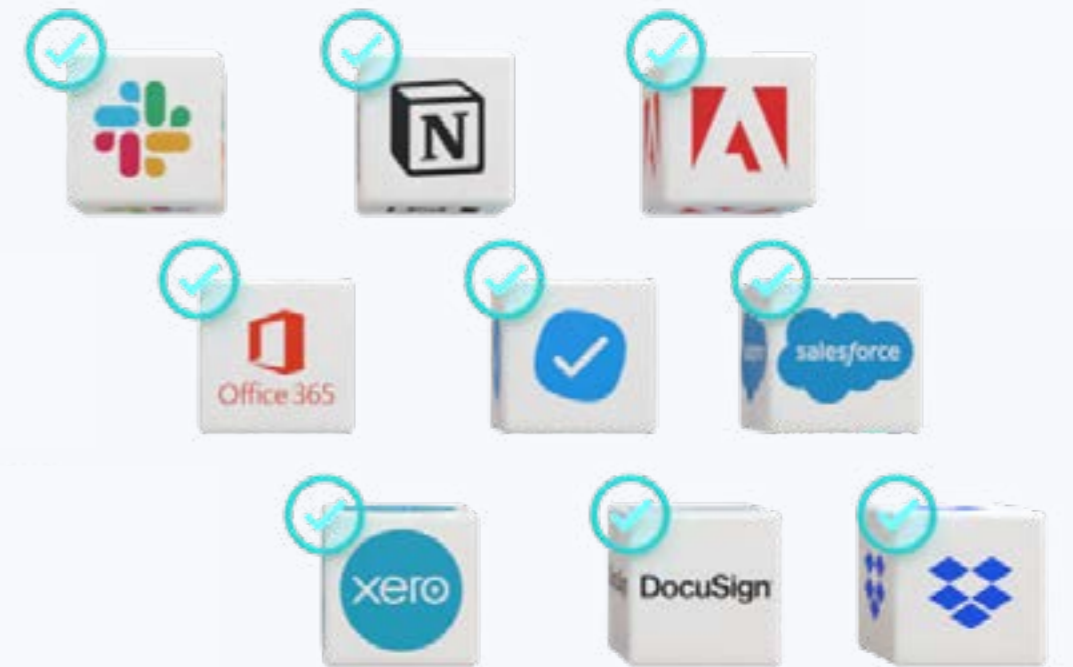

- 4** With this list, we show you the activity on the subscriptions you have already added to your Cledara account.
- 5** When an item on the list doesn't match any application in your Cledara account, we display it in the "Informal SaaS" tab.
- 6** Take the appropriate actions

Privacy Policy

We care deeply about your data privacy. And using Cledara Engage aligned with it.

Cledara Engage is exclusively built for SaaS and only looks for data matching our curated list of SaaS providers, available to the public on our website.

The rest of your employees' browsing history never leaves their devices and neither your company nor Cledara has visibility over any of it.

✓ What we collect

- Names of the SaaS tools accessed
- Timestamp of the access
- Cledara username of the person accessing the tool

✗ What we don't collect

- Browser history that doesn't match our list of SaaS vendors
- Any content from any website, ever
- Anything else

How to set up Cledara Engage

On your device

- 1 Install the extension, available on the [Google Chrome Store](#).
- 2 Log in with your Cledara username and password.

Company-wide

Once you've set up Cledara Engage on your device, you are ready to do so across the company. This will allow you to see the activity on all software accessed by your colleagues.

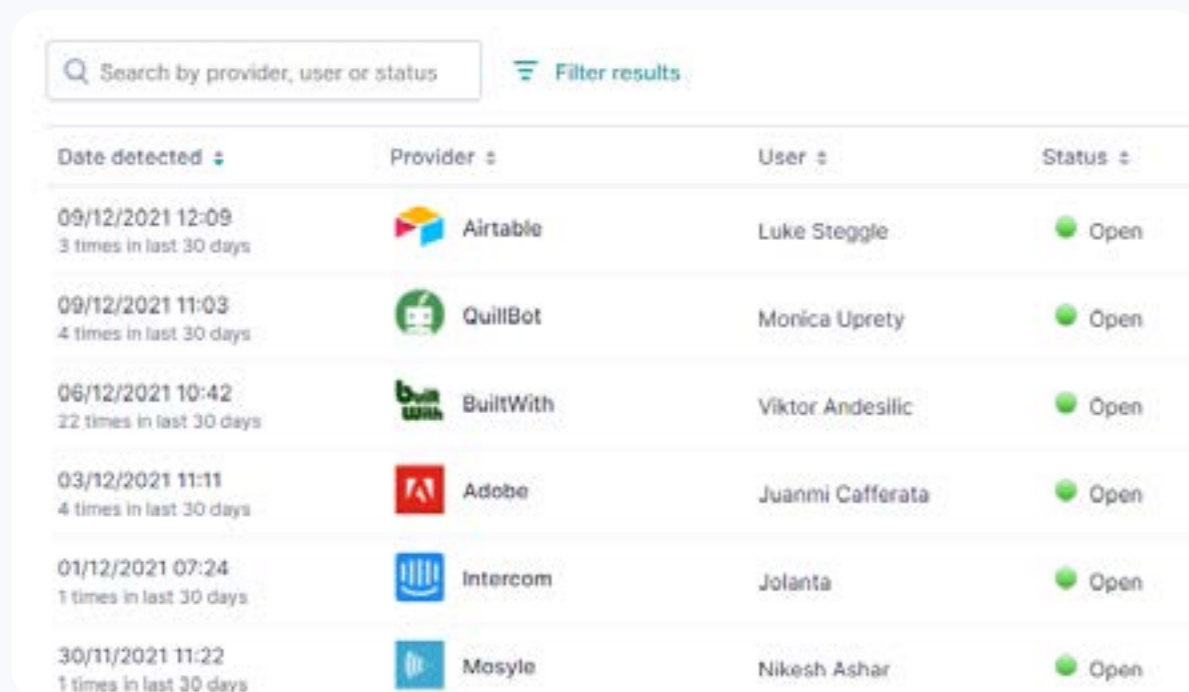

- 1 Invite your colleagues to Cledara by going to Settings > Workspace Settings > Teams and Members, clicking the "Add team members" button and just paste their email.
 - 💡 **Pro Tip: You can add users in bulks of 100. Just copy-paste all emails separated by a space or a comma**
- 2 Once they join Cledara, they will be able to install the extension, available on the Chrome Store, just like you did.

How to visualize the data

You'll be able to see all access data on the Cledara app in a very simple and clean display. Just click on the Engage menu on the left of your screen and you'll see:

1 Shadow IT tab

Where you can see all activity on software that hasn't been added to Cledara.

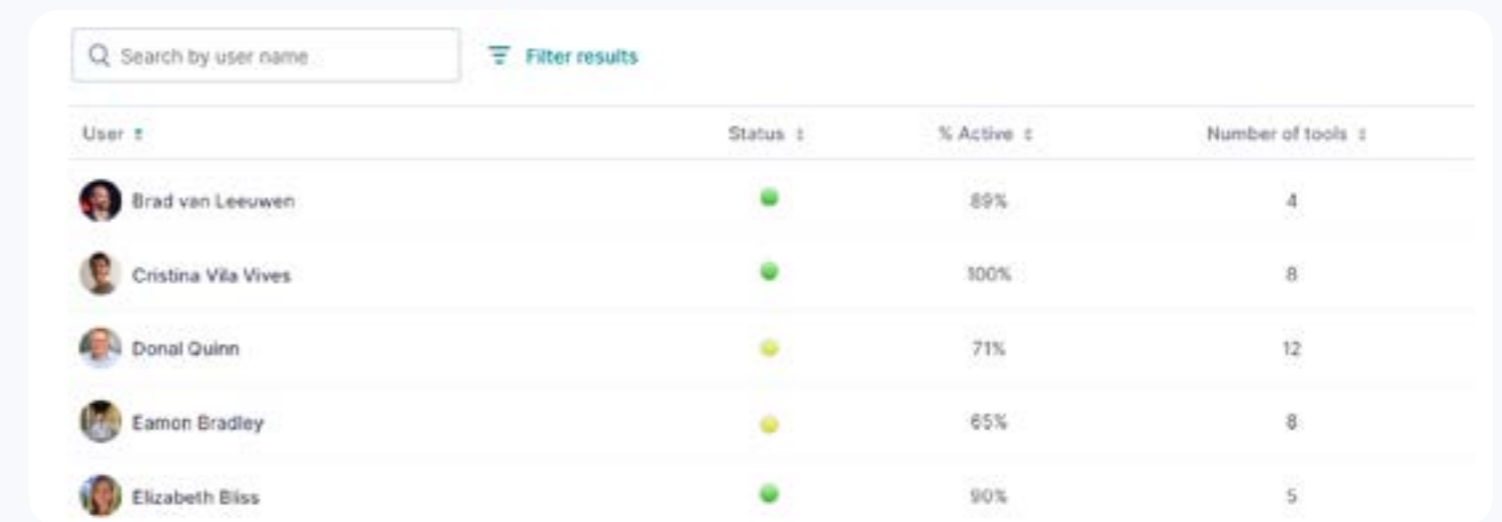

The screenshot shows the Shadow IT tab interface. It features a search bar labeled "Search by provider, user or status" and a "Filter results" button. Below the search bar is a table with the following columns: "Date detected", "Provider", "User", and "Status".

Date detected	Provider	User	Status
09/12/2021 12:09 3 times in last 30 days	Airtable	Luke Steggle	Open
09/12/2021 11:03 4 times in last 30 days	QuillBot	Monica Uprey	Open
06/12/2021 10:42 22 times in last 30 days	BuiltWith	Viktor Andesilic	Open
03/12/2021 11:11 4 times in last 30 days	Adobe	Juanmi Cafferata	Open
01/12/2021 07:24 1 times in last 30 days	Intercom	Jolanta	Open
30/11/2021 11:22 1 times in last 30 days	Mosyle	Nikesh Ashar	Open

2 Users tab

Where you can see all activity by individuals.

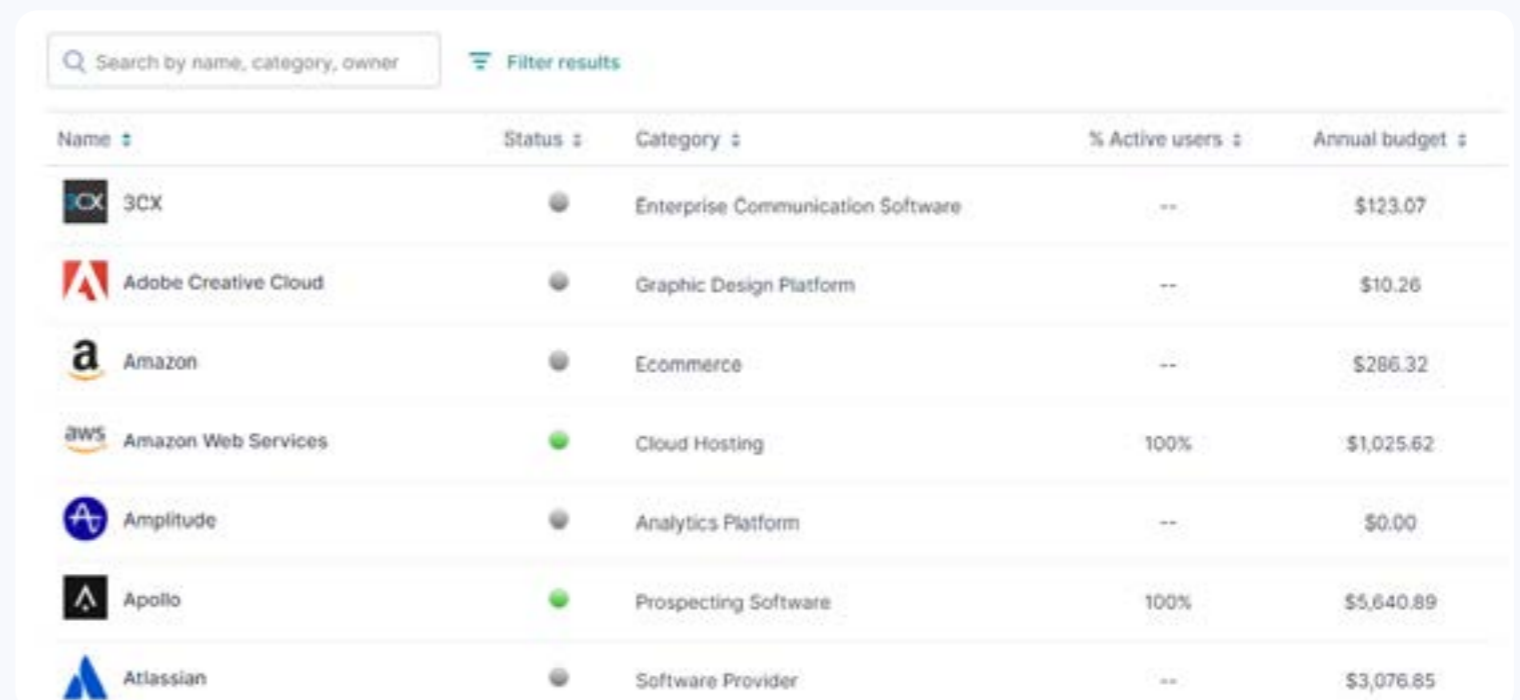

The screenshot shows the Users tab interface. It features a search bar labeled "Search by user name" and a "Filter results" button. Below the search bar is a table with the following columns: "User", "Status", "% Active", and "Number of tools".

User	Status	% Active	Number of tools
Brad van Leeuwen	●	89%	4
Cristina Vila Vives	●	100%	8
Donal Quinn	●	71%	12
Eamon Bradley	●	65%	8
Elizabeth Bliss	●	90%	5

3 Providers tab

Where you can see activity on all applications you have on your Cledara account.

The screenshot shows the Providers tab interface. It features a search bar labeled "Search by name, category, owner" and a "Filter results" button. Below the search bar is a table with the following columns: "Name", "Status", "Category", "% Active users", and "Annual budget".

Name	Status	Category	% Active users	Annual budget
3CX	●	Enterprise Communication Software	--	\$123.07
Adobe Creative Cloud	●	Graphic Design Platform	--	\$10.26
Amazon	●	Ecommerce	--	\$286.32
Amazon Web Services	●	Cloud Hosting	100%	\$1,025.62
Amplitude	●	Analytics Platform	--	\$0.00
Apollo	●	Prospecting Software	100%	\$5,640.89
Atlassian	●	Software Provider	--	\$3,076.85
